

1. This is the outer part of the plate - cut this out first. The arrows serve as tabs to secure the plate. Cut along dotted lines **a** and **b** and pull arrow tabs **A** and **B** through.

2. This is the inside part of the plate. Cut it out and slice along dotted lines **c**, **d**, **e**, and **f**. Pull arrow tabs **C**, **D**, **E** and **F** through the matching gaps, and your plate will be complete. **d**

3. Cut this out, fold inward along the dotted lines, cut along the dashed line to the right and slot the tab through - hey presto, a handy stand for your plate!
